- Git
- Google Cloud

👤 About Me

Dedicated and proficient Software Developer with more than 5 years of experience in programming. Recent Computer Science graduate looking for his next endeavor. Eager to apply his skill and create or improve software products. Capable of working independently or in team to solve problems. Analyzing and innovating existing products.

💼 Professional Experience

Musala Soft | Internship
June 2019 - July 2019

Key points:
- Developed a virtual wallet app in a team of two for budgeting.
- Got training on how the company employees work from the company trainer.
- Got an endorsement letter from the lead trainer based on my performance.

Make Impact | Internship
July 2022 – January 2023

Key points:
- Changed completely the design of the company mobile app.
- Restructured the code architecture to follow best practices.
- Refactored a huge amount of code to follow the same code style and structure.
- Removed all the redundant code and cleared up the app boosting its performance.
- Coded an identical copy of the app in React Native since the original app was written in React.

🎓 Education

KEA - Copenhagen School of Design and Technology
AP Computer Science Degree
August 2020 - January 2023

Key points:
- Studied different aspects of software development such as Software Design, Business values, Project Management, etc.
- Developed numerous projects using different technologies throughout the semesters.
- Learned to learn how to do things independently.
- Had elective courses in React Native, Node JS, Machine Learning.

National program by the Bulgarian Ministry of Education
IT career education
October 2017 - June 2020

Key points:
- Part of the courses I had were OOP, Algorithms, Data Structures, Functional programming, etc.
- Studied primarily C# with its ASP .NET Core framework but also Haskell, and C++ in some of the courses.
- Graduated with 5.26 out of 6 and got EQF Level 3 Certificate for "Applied programming".

🫂 Volunteering

AIESEC in Copenhagen
Account Manager
October 2021 - January 2022

Key points:
- I was making sure that the partners I was managing were as happy as possible with our service.
- Worked in a team of four with a leader that was teaching us every week new aspects of the job.
- Together with account managing, I was doing also sales for the organisation, trying to find new partners.

AIESEC in Copenhagen
Regional Manager of Operations
January 2022 - January 2023

Key points:
- Led a team of 4 people whose purpose was to ensure the customer satisfaction of all the people we were working with.
- Had been audited every month if all the customer standards we had were covered and got 0 Violations for the whole year.
- Trained all of the new recruits for my team about what the organization was all about and how to do their job properly.
.

AIESEC in Copenhagen
Regional Manager of Business Development
August 2022 - January 2023

Key points:
- Took over the position after the previous manager left the organization unexpectedly.
- Revived the department by leaving it with 4 trained business development people, one of whom replaced me as a manager.
- Couldn't achieve my goals for the duration but I left a structured team after starting from scratch.

📇 Certificates

Cambridge English: Advanced
January 2020

AP Computer Science Degree
January 2023

EQF Level 3 Certificate for "Applied programming"
June 2020
